

## **Works Computing Hosts HP's Mark Hurd at Executive Roundtable Event for Local Business Leaders**

*Minnesota Leaders Gather to Hear Industry Strategy from Hurd*

**MINNEAPOLIS** – September 22, 2009 - Works Computing, a leading enterprise class IT solutions provider in the Midwest, today announced it hosted an Executive Roundtable event at its corporate headquarters in Minneapolis with Mark Hurd, chairman and chief executive officer of HP. The roundtable was an opportunity for senior executives from Works Computing and HP to meet with area CIOs and business leaders to discuss new ways to create business growth opportunities in a down economy.

Attending were Works partner customers representing healthcare, financial, commercial and state and local government entities, including: The Mayo Clinic, State of Minnesota, Fingerhut, Ameripride, et al.

"Works Computing and its customers are very proud of our long-standing relationship with HP and the continued support of a visionary like Mark Hurd," said Pat Cadle, chief executive officer at Works Computing. "HP is always there to help us and our customers get the most out our technology and businesses through innovative programs like this one that explore the best ways to nurture growth in any economic climate."

Serving as a forum to discuss strategies for addressing current IT industry challenges and trends, discussion topics included HP's overall strategy, data center transformation, IT consolidation and how they can help customers through these tough economic times – all relevant issues for today's C-level decision makers who face shrinking budgets and heightened expectations.

"I have never met anyone who had as much command of his business and the IT industry as Mark Hurd," shared Paul Hanson, chief information officer at Young America. "It was great to have him spend time with us, talk about our issues, and communicate how HP is engaged with its customers."

### **About Works Computing**

Works Computing is a Minnesota based technology solutions provider dedicated to helping businesses meet their enterprise IT goals through personalized hardware, software and service solutions. Established in 1994, its years of experience translate into a unique ability to consult, design, deploy and maintain its customers' IT infrastructure.

Specializing in IT transformation, modernization, consolidation and virtualization projects, Works Computing is one of the Midwest's most reliable IT solutions partners. The company built its business on delivering enterprise class IT solutions that not only work, but also stand the test of time.
